RE: Request to Postpone Amendment to MNGWPD Wastewater Management Plan

Dear Danny:

As you are aware, Hall County is in the planning stages to provide for sewer availability to approximately Seven Thousand Acres of Hall County in the north 365 corridor, a prime corridor for economic development in the County. On August 12, 2013, we submitted a request for an Amendment to the MNGWPD Wastewater Management Plan (copy attached). This was discussed at your Executive Board Meeting and was publicly advertised as a major plan amendment.

It is our understanding that this amendment could be considered at the Board Meeting on December 5, 2013. As a result of an Intergovernmental Agreement reached with the City of Gainesville for treatment of up to 750,000 GPD MMF and a letter we received from EPD Director, Jud Turner, informing us of other permit issues needing addressing as they pertain to interbasin transfer (copy attached), we are hereby requesting a postponement of the modification to the MNGWPD plan to include this project as planned.

Thank you for your assistance on this request, and please advise us of any additional information required of us at this time.

Respectfully submitted,

Ken Rearden, P.E.  
Director, Hall County Public Works & Utilities

C: Randy Knighton, County Administrator w/attachments
